

99% NATURALLY SOURCED INGREDIENTS

In April 2019, Ewa Chodakowska together with a team of aficionados of everything that is natural are launching a new, exceptional brand offering everyday skin care products in the Polish market.

beBIO products were created for the love of everything that is natural. This well-known trainer – in cooperation with a team of beauty experts – created shower gels, body lotions and deodorants that contain over 99% of naturally sourced ingredients. It is definitely a phenomenon in our market! Superfoods which are the number one ingredients of natural beBIO cosmetics are the same superfoods which are also used in a healthy diet: chia seeds and Japanese cherry blossom, spirulina and chlorella, goji berry and pomegranate, almond, African pepper, bamboo, lemongrass, flax seed, aloe vera, shea butter and cocoa butter, vegetal oils, sea salt, and many more.

How did it all begin?

The message from Ewa Chodakowska

I met some cosmetic experts who made me realize the importance of ingredients that can be found in products I apply on my skin on a daily basis. It was them who told me that many cosmetics contain substances that are hazardous to my health! What are they? Formaldehyde and its derivatives, other preservatives as well as unnecessary chemical substances which are harmful to health such as: petroleum derivatives, silicones and many... many more!

The girls, who I am in touch with both in social media and the real world, also signaled topics concerning body care on numerous occasions what in turn made me search for relevant information and expand my knowledge. Before long I understood how many unnecessary and harmful substances surround us every day. It came as a shock to me.

I do sports and eat healthy. So I thought it was time to implement conscious body care as well. I started testing natural cosmetics available in the market, but unfortunately they were not always easily accessible. That is why, in cooperation with the experienced beauty experts and healthy lifestyle aficionados, I have created natural beBIO cosmetics that in 99% contain naturally sourced ingredients. It was my dream to establish a 'democratic' brand –accessible to the majority of people and I managed to achieve this goal.

Brand Philosophy

We believe that everything you apply on your skin matters. That is why each of our products was formulated with ingredients that love our skin and meet all our skin care needs. We tested them on our own skin and that is why we can confidently share our creations with you. We believe that natural products should be available at affordable prices on almost every street corner. That is who we are!

beBIO Brand

beBIO cosmetics are crazy about the quality and natural ingredients. All our products contain over 99% of naturally sourced ingredients! They do not contain formaldehyde or its derivatives, parabens as well as other harmful preservatives, petroleum derivatives, silicones; they are also PEG, SLS and phthalate free. Instead we filled our bottles with superfoods ingredients which we use in a healthy diet such as chia seeds and Japanese cherry blossom, spirulina and chlorella, goji berries and pomegranates, almonds, African pepper, bamboo, lemongrass, flax seed, aloe vera, healthy butters, vegetal oils, and many more. beBIO offers natural shower gels, body lotions and roll-on deodorants.

What is important to us?

We do care about your health and also about our place on the Earth. That is why for the production purposes we use deionized water which is recovered. We keep all the highest quality standards and test all our cosmetics on our skin first. We love animals and plants, and thus all our shower gels, body lotions and deodorants are purely vegan and not tested on animals

Natural beBIO Shower Gels

We developed natural beBIO shower gels because we dreamed about natural products that will neither dry nor irritate the skin. Our life is active; we do sports and often take a shower. We are crazy about being natural and having such benefits as soft and moisturized skin already while cleansing our body; and that is why our shower gels contain as much as 99.4% of naturally sourced ingredients which provide both moisturizing and nourishing properties.

We obtained our delicate washing components from, among others, coconut oil and rapeseed oil. We matched them with sea salt minerals which soften the skin and improve its condition thanks to both macro- and microelements. In our shower gels you will also find aloe vera leaf juice that perfectly moisturizes and soothes the irritated skin as well as superfoods ingredients inspired by a healthy diet.

We offer shower gels in big size pump bottles (400ml) to use at home as well as smaller travel tubes (200ml) – perfect for the gym or while travelling.

Natural beBIO Body Lotions

We have created natural products that guarantee long-lasting moisturizing and truly nourishing properties after each application – contrary to some cosmetics available in the market that only optically smooth the skin and consequently make it dry! We are crazy about natural ingredients, quality and efficacy, and that is why our body lotions contain as much as 99.4% of naturally sourced ingredients which provide both moisturizing and nourishing properties.

The rich texture of our body lotion moisturizes and firms the skin leaving it more beautiful and smoother day by day. The skin-benefiting ingredients found in our natural body lotions – such as shea butter, cocoa butter and vegetal oils – nourish and strengthen the skin.

Aloe vera leaf juice soothes the irritated skin as well as moisturizes and regenerates it at the same time. Additionally, we enriched our body lotions with various superfoods ingredients which are used in a healthy diet.

We offer body lotions in big size pump bottles (400ml) to use at home as well as smaller travel tubes (200ml) – perfect for the gym or while travelling.

Natural beBIO Roll-On Deodorants based on natural mineral alum

Our life is active; we do sports and we perspire. We were searching for natural, safe and efficient deodorants. We created such products on our own as we could not find them in the market. We are crazy about natural ingredients and high quality, and that is why our deodorants contain as much as 99.4% of naturally sourced ingredients that efficiently protect against an unpleasant odor and additionally provide nourishing properties.

We have developed beBIO deodorants on the basis of natural mineral alum which prevents formation of an unpleasant odor. Our product is a deodorant and not an antiperspirant. Instead of blocking the sweating process, it prevents formation of an unpleasant odor. Alum is a natural antimicrobial agent with antibacterial, antiseptic and astringent properties. Therefore, after application it prevents bacterial growth on the skin and consequently formation of unpleasant odors coming from the bacterial breakdown. We need to keep in mind that perspiration is a natural process that enables us to remove harmful toxins from our body.

Spray deodorants significantly contribute to the depletion of the ozone layer which protects us against harmful UV radiation and that is why beBIO deodorants are in the form of a convenient roll-on, perfect to be used at home as well as to be taken to the gym or while travelling.

beBIO Product Lines

The beBIO product portfolio includes 5 fragrance variants and also a fragrance free one for people with sensitive skin prone to allergies. Each beBIO product line has been enriched with active superfoods ingredients used in a healthy diet:

- Chia Seeds and Japanese Cherry Blossom which care for the skin. Chia seeds are a source of antioxidants as well as omega-3 and omega-6 fatty acids which are responsible for collagen replenishment. Japanese cherry blossom soothes all types of skin, restores the skin's hydrolipidic film, moisturizes and makes it smooth. It also enhances the skin's elasticity, and additionally evens out its tone.
- Spirulina and Chlorella which are a great source of vitamins. Blue algae – spirulina – have moisturizing, soothing and rejuvenating properties. It is possible thanks to the high concentration of vitamins, minerals and antioxidants. Green algae – chlorella – have purifying properties and act as storage of fatty acids which contribute to regeneration and protection of epidermis.
- Goji Berry and Pomegranate which regenerate the skin and fight free radicals. Goji berries have soothing and regenerating properties and they accelerate epidermal renewal as well as moisturize and increase production of collagen fibers making skin firmer. Pomegranate is a natural antioxidant; it also accelerates the skin healing process and tightens pores.
- Almond and African Pepper which delay the skin's ageing process and purify it. Almond oil is a rich source of vitamins, magnesium, proteins and mineral salts. It removes dead skin cells, moisturizes, soothes the irritated skin and is quickly absorbed. Pepper has detoxifying and antibacterial properties, improves blood circulation, cleanses the skin and prevents cellulite.

- Bamboo and Lemongrass which make the skin firmer. Flavonoids found in bamboo shoots support the fight against free radicals, delay the skin ageing process and strengthen blood vessels. Lemongrass is famous for its antibacterial and anti-inflammatory properties; it warms up, tightens pores, inhibits overproduction of sebum, soothes and moisturizes the skin.
- Flax Seed which works wonders in the world of cosmetology. The cold pressed Flax Seed Oil is rich in omega-3 fatty acids and vitamins that are perfect for fighting with dry and atopic skin; it is also a suitable ingredient of everyday cosmetics recommended for oily skin. Thanks to *alpha*-Linolenic acid, which inhibits sebum production, it cleanses pores and reduces imperfections.

Natural beBIO Shower Gels, 200 ml, price PLN 15.99:

Natural beBIO Shower Gel with Bamboo and Lemongrass extracts

Natural beBIO Shower Gel with Chia Seed and Japanese Cherry Blossom extracts
